CVD risk is high in people with CKD.

Kidney disease is ranked in the top leading causes of death in the United States.

Every 24 hours, 170 people with diabetes begin treatment for kidney failure.

Approximately 1 in 3 American adults with diabetes has CKD.

Screening for Diabetes-Related Kidney Disease

Who?
- Everyone with type 2 diabetes
- Everyone with type 1 diabetes for ≥ 5 years

How?
- UACR and eGFR

When?
- Annually

Management of Diabetes-Related Kidney Disease

Why Manage?
- Decreases risk of CKD progression
- Cardiovascular risk reduction

Pillars of Therapy to Reduce Cardiorenal Risk

- RAAS Blockade
- SGLT2-inhibitors
- NS-MRAs (Finerenone)
- GLP-1 RAs

Reduction in Cardiorenal Events

Lifestyle Modification and Diabetes Education
